*Includes DeliveryWare, Esker on Demand and FlyDoc

** Growth expressed with no currency effect: 2007 exchange rates applied to 2006 figures

Strong growth of document process automation solutions

Growth of document process automation solutions rapidly accelerated over the course of the 2nd quarter reaching 41% compared to 26% achieved in the 1st quarter. Thus, the progression of 33% for the first half of the year is largely above the market growth rate (23%) forecasted by IDC. Sales of Esker DeliveryWare solutions targeting large organizations grew by 37%. FlyDoc also demonstrated excellent results by crossing the threshold of 300,000 euros in monthly invoicing increasing its growth rate by 80% compared to the 2nd quarter 2006. The “on Demand” solutions continue to expand rapidly with nearly 9 million pages sent or received over the course of the quarter and has celebrated the addition of its 1000th customer in June.

Launch of the new version of DeliveryWare

The launch of the new version of DeliveryWare in May proved to be an immediate success with customers, partners, and prospects. Equipped with new functionality to automate sales order processing, this version seamlessly integrating into SAP should allow Esker to significantly increase the number and the average size of business deals to large companies. For the launch, Esker took part in SAP's international customer conference – SAPHIRE 07 – held in Vienna, Austria and Atlanta, Georgia and brought its customers together in France and in the United States to present its new solutions.

Significant investment in “on Demand” solutions

During the quarter, the company has continued to significantly invest in its “on Demand” solutions including FlyDoc and Esker on Demand through the expansion of its mail facility in Villeurbanne, tripling the FlyDoc and Esker on Demand sales team in France and the launch of its new Mail and Fax on Demand for SAP offers.

2007 Outlook

Performance realized by Esker during the first half of the year 2007 is in line with the company forecast. Similar to 2006, significant investments carried out during the period and the seasonal effect of sales, will not allow positive operational results for the first half of 2007. However, it should be mentioned that the shift in sales traditionally observed towards the end of year allowed Esker to realize a positive profitability in 2006. In addition, the current level of sales activity for its document automation solutions allow Esker to remain very optimistic about the continuation for

the remainder of 2007 of the rapid growth that the company has experienced over the past few years on these product lines..

About Esker

Esker is a recognized leader in helping organizations eliminate manual processes, gain process visibility and control, and reduce the use of paper by automating the flow of documents into, within and out of the organization. With patented document delivery automation software and hosted document delivery services, Esker offers a total solution to automate every phase and every type of business information exchange. Customers achieve significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months. Found in 1985, Esker operates globally with more than 80,000 customers and millions of licensed users worldwide. Esker has global headquarters in Lyon, France and U.S. headquarters in Madison, Wisconsin. For more information, visit www.esker.com.

Esker is traded on Euronext, the French Stock Exchange (Le Nouveau Marché/ISIN: FR0000035818).
