*Includes DeliveryWare, Esker on Demand and FlyDoc

** Growth expressed with no currency effect: 2007 exchange rates applied to 2006 figures

Document automation solutions continue to support growth

Document Automation Solutions continue to surge over the course of Q3, 2007 reaching 42% compared to 33% achieved during the first half of the year. These solutions contributed 64% of sales revenue during Q3.

Sales of Esker DeliveryWare document process automation targeting large companies grew by 27% compared to 20% during the first half of the year. In addition FlyDoc exhibited an outstanding performance crossing a new threshold of **3,000,000** pages per month, realizing a sales progression of 108% in comparison to the same period in 2006. Mail and Fax on Demand for SAP offers are also demonstrating strong performance that will benefit 2008 sales activity.

Seesaw effect between Europe and the U.S.

As Europe posted very dynamic growth at 32% for Q3 (+68% specifically for document process automation), the United States suffered a slowdown in sales activity. US companies seem to have a tendency to delay projects until some of the economic uncertainties that are currently heavily weighing on the country clear up. This setback has caused U.S. sales to decline 11% over the course of Q3.

Investments to grow on Demand solutions still going strong

Over the course of Q3, Esker has continued to make large investments in its on Demand solutions: FlyDoc and Esker on Demand. These investments are best represented by the extension in production capacities to the Esker

Production Facility in Villeurbanne, France and the addition of new servers dedicated to document archiving. Sales and marketing investments are equally favored with the launch of the online archiving offer for FlyDoc as well as marketing campaigns including Esker's first radio advertising campaign on the French business radio station BFM.

Outlook

Thanks to excellent results achieved in Europe during Q3, which have compensated for the soft performance in the U.S., total sales for Esker remain on target with the company's plans.

With growth of 35% in comparison to the same period in 2006, the company's sales pipeline makes it possible to envision dynamic growth through the end of the year and into 2008, including on the US market. The weakness of the US Dollar against the Euro and the current concerns over the health of the American economy may nevertheless adversely impact future performance, without however jeopardizing the overall growth outlook for the company.

About Esker

Esker is a recognized leader in helping organizations eliminate manual processes, gain process visibility and control, and reduce the use of paper by automating the flow of documents into, within and out of the organization. With patented document delivery automation software and hosted document delivery services, Esker offers a total solution to automate every phase and every type of business information exchange. Customers achieve significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months. Founded in 1985, Esker operates globally with more than 80,000 customers and millions of licensed users worldwide. Esker has global headquarters in Lyon, France and U.S. headquarters in Madison, Wisconsin. For more information, visit www.esker.com.
